

## **BoRit Asbestos NPL Site**

### **Weekly Summary October 17 – October 21, 2011**

#### **REMOVAL OPERATIONS UPDATE**

##### **Work completed this week**

1. Continued excavation along the Tannery Run side of the pile and relocated the waste to the northwest side of the pile. At the end of the day, exposed areas were either covered with straw mat or soil. Dust suppression was conducted during activities.
2. Placed geotextile fabric on the sections where the subgrade elevations had been achieved.
3. The piezometer (monitoring well) on top of the pile was raised to meet the proposed grade and concreted into place.
4. Completed the installation of the aluminum handrail along Rose Valley Creek.
5. Continued pickup of ACM debris.
6. The site was closed on Wednesday due to heavy rains.
7. Rainfall: As of noon on Friday, approximately  $\frac{3}{4}$  of an inch.

##### **Work scheduled for next week**

1. Continue ACM pickup along the Wissahickon Creek and GRT.
2. Continue excavation of the Pile to meet the grading plans of a 3:1 slope.
3. Continue inspection, repair and replacement of E&S controls, as needed.
4. Continue operation and maintenance of the Phases I, II, III, IV, and V as needed.

##### **Upcoming work (fall)**

1. Continue grading the Pile. The sides of the Pile will be graded to a 3:1 slope. Geotextile will be placed over the entire area; clean material will be placed, graded and compacted. Then, the area will be hydroseeded to promote vegetation.
2. Dewater Rose Valley Creek to properly assess the damage to the CCMs, caused by the Remnants of Tropical Storm Lee.

#### **REMEDIAL OPERATIONS UPDATE**

1. Nothing to report.

#### **COMMUNITY INVOLVEMENT OPERATIONS UPDATE**

1. Nothing to report.
